Address: Seattle, WA

I am a (Full stack developer) with 3+ years of experience in designing, developing, and implementing applications and solutions using a range of technologies and programming languages. I have a strong understanding of both the front-end and back-end of web development, and I am able to work independently or as part of a team to deliver high-quality products. In addition to my extensive office experience, I have strong communication and administrative skills.

Authorized to work in the US for any employer

Key Skills:

HTML5, CSS3, JavaScript, React.js, Next js, Bootstrap, Typescript, UI/UX Design. Node.js, Express, REST API, MongoDB, MySQL, Git, Linux, Payment Gateways, Photoshop, MS Office

Projects

From 2023 till now

Portfolio App
Link:
Technologies: HTML, CSS, JavaScript, React
Status: 90% Done
Description:
Developed a personal portfolio website to showcase my web development projects. The app features responsive design, smooth navigation, and a clean interface, built using React for dynamic rendering of content. Integrated modern CSS techniques for styling and user interaction.

Sudsy Carwash
Link:
Technologies: HTML, CSS, JavaScript, React, Vite
Status: Completed
Description: Developed a fully responsive website for a car wash service, showcasing services, pricing, and contact information. The site features a clean and user-friendly interface that allows customers to easily navigate through different sections. This project helped the client improve their online presence and attract more customers through a professional web platform.

Food Ordering App
Link:
Technologies: HTML, CSS, JavaScript, React, Node.js, Express
Status: 60% Done
Description:
Currently developing a food ordering platform that allows users to browse menus, place orders, and manage their cart. This app integrates the front-end (React) with back-end technologies (Node.js and Express) for a complete full-stack experience. The project demonstrates my ability to build scalable applications with server-side functionality and real-time updates.
